MED WORLD ABOUT CAREER

General Physician (MBBS)

Do you want to cure people of their illness? Does the thought of providing medical help to people give you satisfaction? If yes, you are the best person to be a doctor and serve people with your services.

A doctor is a certified medical practitioner who diagnoses and treats you for your illness. They play an essential role in guiding their patient to maintain a healthy body and mind. A doctor has to be very alert, sympathetic and well organized in order to deliver successful results. Apart from treating, the doctor also informs his patients about the precautions to be taken to avoid illness, records their medical history and also interprets the diagnostic tests done by the medical technicians. There are numerous specializations that can be done in this field after M.B.B.S. studies. For example, cardiologist (heart specialist), Dermatologist (skin, hair, and nails doctor), Neurologist (brain doctor) etc.

What are the roles and responsibilities for Doctor?

- Analyzes records, reports, test results, or examination information to diagnose medical conditions of the patient.
- Examines or conducts tests on patient to provide information on a medical condition.
- Prescribed or administers treatment, therapy, medication, vaccination, and other specialized medical care to treat or prevent illness, disease, or injury.
- Monitors patients' condition and progress and re-evaluates treatments as necessary.
- Explains procedures and discusses test results on

What are the roles and responsibilities for General Physician?

- Stronon
- Cardiologist
- Dermatologist
- Family Doctor
- General Physician
- Neurologist
- Super speciality doctor

Alternative Medicine (BAMS)

Do you want to cure people? Do you prefer to utilize foods and supplements as medicine? If yes, then you should consider your career in Ayurveda.

The Ayurvedic medicines aim at strengthening the capacity of the body to fight diseases. The medications used for this purpose are made from herbs, minerals, and metals. The treatment also includes massages, special diets and cleansing techniques. Ayurveda divides the human body into three main components (Doshas), namely Vata, Pitta and Kapha, which is believed to be an actual cause of every imbalance or disorder occurring in the human body. Example: Nuzlak, Dabur India Ltd., Patanjali Ayurveda, Baidyanath, and Himalaya Wellness are few of the top Ayurveda companies in India.

What are the roles and responsibilities for Ayurvedic doctor?

- Conducting screening and diagnostic tests to reveal health issues.
- Ayurveda also uses panchakarma therapy as a part of its treatment which involves purification through a processes of vomiting, purgation, enema, elimination through the nose, and blood detoxification.
- Ayurveda is a personalized approach to health, and knowing your mind/body type allows you to make optimal choices about diet, exercise, supplements, and all other aspects of your lifestyle.
- Ayurveda and Unani are forms of alternative medicine several thousand years old. Ayurvedic

What are the career opportunities in Ayurveda?

- Assistant Director (Ayurveda)
- Assistant Research Officer
- Ayurveda Consultant
- Ayurveda Physician
- Deputy Director (Ayurveda)
- Director (Ayurveda)
- Pharmacist
- Professor/ Associate Professor/ Assistant Professor
- Publication Officer (Ayurveda)
- Research Officer
- Scientist
- Supervisor in Panchakarma centers
- Unani Specialist
- Ayurveda Medical Officer

MED WORLD ABOUT CAREER

Medical Radiology Technician

Radiology technician is a medical specialist who assesses medical imaging to diagnose diseases within the human body. This diagnosis helps to know the severity of the disease and provide accurate data to doctors to cure the patient. It includes X-ray, ultrasound, MRI scan etc.

What are the roles and responsibilities for Radiology Technician?

- Perform Diagnostic Imaging Procedures.
- Evaluate Patients' Medical Histories.
- Interpret Test Results.

What are the career opportunities for Radiology Technician?

- Mammographer
- Mammography Technologist
- Radiographer
- Radiologic Technologist (RT)
- Radiological Technologist
- Radiology Technologist
- Staff Technologist
- X-Ray Technologist (X-Ray Tech)
- Computed Tomography Technologist (CT Technologist)

Optometrist

Optometrists are the technicians who examine eyes issues. Optometrists are professionals with technical knowledge about visual disorder. The main point to be noted here is that an optometrist is not a doctor. Their primary responsibility is to diagnose eye-related defects like near-sightedness, farsightedness, or other visual impairments

What are the roles and responsibilities for Optometrist?

- Examine eyes, using observation, instruments and pharmaceutical agents, to determine visual acuity and perception, focus and coordination and to diagnose diseases and other abnormalities such as glaucoma or color blindness.
- Prescribe, supply, fit and adjust eyeglasses, contact lenses and other vision aids.
- Analyze test results and develop a treatment plan.
- Prescribe medications to treat eye diseases if state laws permit.

What are the career opportunities in Optometry?

- Doctor of Optometry (OD)
- Eye Clinic Manager (Ayurveda)
- Independent Contractor
- Optometrist
- Optometric Assistant (Ayurveda)
- Optometrist/Practice Owner
- Owner
- Optometry Service
- President/Practice Owner

Medical Laboratory Technologist

Medical Lab Technologist is a laboratory technician who plans, conducts and summarizes each medical test carried out in the pathology or medical lab. These tests can be blood, tissue or other body fluids. Medical lab technicians (MLT) are the critical members of a medical team and are responsible for providing accurate data to the doctors for analyzing the physical condition of the patient.

What are the roles and responsibilities for Medical Laboratory Technologist?

- Medical laboratory technicians assist physicians in the diagnosis and treatment of diseases by performing tests on tissues, blood and other body fluids.
- Medical lab technicians most commonly work in hospitals or doctors' offices.
- Conduct chemical analyses of

What are the career opportunities in Medical Laboratory Technologist?

- Radiology technicians
- ICIS Technicians
- Medical & Clinical Laboratory Technicians
- Operation Theatre Technicians
- Pathologist
- X-ray technicians

What are the roles and responsibilities for Pharmacist?

- Dispense drugs prescribed by physicians and other health practitioners
- Provide information to patients about medications and their use.
- Plan, monitor, and evaluate drug programs
- Maintain records, such as pharmacy files, patient profiles, inventories etc.

What are the career opportunities in Pharmacy?

- Chemist
- Medical representative
- Pharmacist
- Pharma Research

Nutrition & Dietetics

In today's era, there is a high awareness of a healthy lifestyle. More and more people are opting for the fitness program. Weight loss or gain is mainly dependent on our food intake. A nutritionist or dietitian is the professional who can guide people through this process. They guide people on their vitamins, nutrients, calories, and fat intake.

What are the roles and responsibilities for Dietician?

- Nutritionist, plan and conduct food service or nutritional programs to assist in the promotion of health and control of the disease.
- Supervise activities of a department for analyzing quantity food services, counsel individuals, or conduct nutritional research.

What are the career opportunities in Nutrition & Dietetics?

- Clinical Dietician, Clinical Dietician, Correctional Food Services Supervisor, Dietary Manager, Dietitian, Nutritionist, Outpatient Dietitian, Pediatric Clinical Dietician, Registered Dietician, Registered Dietitian.

ABOUT CAREER

Homoepathy (BHMS)

Do you want to help people cure their illness? Do the natural means of cure grab your attention? Do you believe more in natural remedies rather than allopathy? If yes, then you should consider a career in homeopathy.

Homeopathy is a branch of medicine that believes in natural treatment methods. Homeopathic medicines are completely made from natural means like plants, vegetable, minerals, or animals. A homeopathic doctor believes in holistic treatment that is they aim at curing the entire body of the patient instead of focusing on one part. They use homeopathic remedies to stimulate the healing process.

similibus curetur" which means let similar things take care of similar things. This is an alternative form of treatment which is non-invasive and very different from the allopathic form.

- Diagnosis based on the complete history of the disease in the patient.
- Homeopaths assess their patients by asking them in depth questions about their health problems, lifestyle, medical history, diet and personality.
- Treatment is given based on the diagnosis and the medication is mild and in minute quantities.
- Investigation and treatment

What are the career opportunities in Homeopathy?

- Medical consultant
- Chief medical officer
- Homeopathic Doctor
- Homeopathic Professor
- Electro homeopathy doctor

Nurse and Medical Assistant

In the healthcare sector, nurses play an essential role. They mainly focus on patient care for faster recovery. Nursing encompasses health education, disease prevention, and caring for people with diseases and disabilities.

What are the roles and responsibilities for Nurse?

- Performing tasks such as preparing patients for operations, monitoring pulse, blood pressure and temperature.
- Work closely with doctors to implement care plans.
- Writing patient care plans
- Observing and recording the condition of patients.
- Checking and administering drugs and injections.
- What are the career opportunities for Nurse?
 - Dialysis nurse
 - Director of Nursing
 - Emergency nurse
 - Intensive care unit (ICU) registered nurse
 - Operating Room Registered Nurse
 - Registered nurse (RN)

Physiotherapy (BPTH)

Are you interested in curing the people? Do you want to cure physically disabled people? Would you also like to help people recover from their injuries? If yes, then you should consider a career in physiotherapy.

As the name suggests, Physiotherapy or Physical therapy is a medical science that uses a physical approach to restore and maintain the natural body movement and the function in an injured or disabled patient. A physiotherapist has detailed knowledge of human body dynamics and about every movement of all the body parts.

Example: Dr. Shobha Keswani, Dr. Navneet K.S. Dr. Nigamaja Harisharan, Dr. Tarun Laha, and Dr. Shuchita Bansal are few of the top physiotherapist in India.

What are the roles and responsibilities for Physiotherapist?

- Diagnose and assess patients' physical conditions.
- Devise and review treatment programmes using manual therapy (such as massage), therapeutic exercise and electrotherapy.
- Collaborate with multidisciplinary teams to provide the best treatment.
- Maintain and update patient records and documents.
- Evaluate the effects of treatment

at various stages and adjust treatments to achieve maximum benefit.

- Test and measure patient's strength, motor development and function.

What are the career opportunities in Physiotherapy?

- Cardiovascular Physiotherapist
- Geriatric Physiotherapist
- Neurology Physiotherapist
- Obstetric Physiotherapist
- Orthopedic Physiotherapist
- Post Operative Physiotherapist
- Sports Physiotherapist
- Occupational physiotherapist
- Paediatrics Physiotherapist
- Physiotherapist

Audiologist (BASLP)

Audiologists are technicians who can diagnose your hearing related problems. The important thing to understand here is that they are very different from the ear doctors like ENT. An audiologist can only diagnose hearing problems using advance instruments but can't perform medical ear surgeries.

What are the roles and responsibilities for Audiologist?

- Administer hearing tests and examine patients to collect information on type and degree of impairment, using specialised instruments and electronic equipment.
- Fit, dispense, and repair assistive devices, such as hearing aids.
- Evaluate hearing and balance examine patients to determine diagnoses and courses of treatment.

What are the career opportunities in Audiologist?

- Audiology Director
- Audiologist Doctor (AUD)
- Certificate of Clinical Competence in Audiology Licensed Audiologist (CCC-A)

Healthcare Industry in India

Doctor-population ratio 1:854, assuming 80% availability of allopathic doctors, 5.65 lakh AYUSH Dr: Govt

The Indian healthcare market, which is worth around US\$ 100 billion, will likely grow at a CAGR of 20 per cent to US\$ 280 billion by 2020. The healthcare market can increase three fold to US\$ 872 billion by 2022. India is experiencing 20-25 per cent growth in medical tourism and the industry is expected to double. Doctor population ratio 1:854, assuming 80% availability of allopathic & Ayush doctors. There are 12.68 lakh allopathic doctors registered with state medical councils and the National Medical Commission (NMC). Nurse-population ratio is 1:559. Deloitte Touche Tomhata India has predicted that with increased digital adoption, (Source: Economic Times)
